

Quarterly Notes

1. Introduction

This report has **bold facts** and *gentle italics* for every example we tried. See the project site for more details and the full data set, which is well-known.

Things we checked:

- Revenue grew in every region
- Costs stayed flat
 - Except for shipping
- Hiring resumed

Steps to reproduce:

1. Download the data
2. Run the script

```
def total(rows):  
    return sum(r.amount for r in rows)
```

Region	Q1	Q2
North	120	135
South	98	101

That is all for the first page.

2. Two Columns

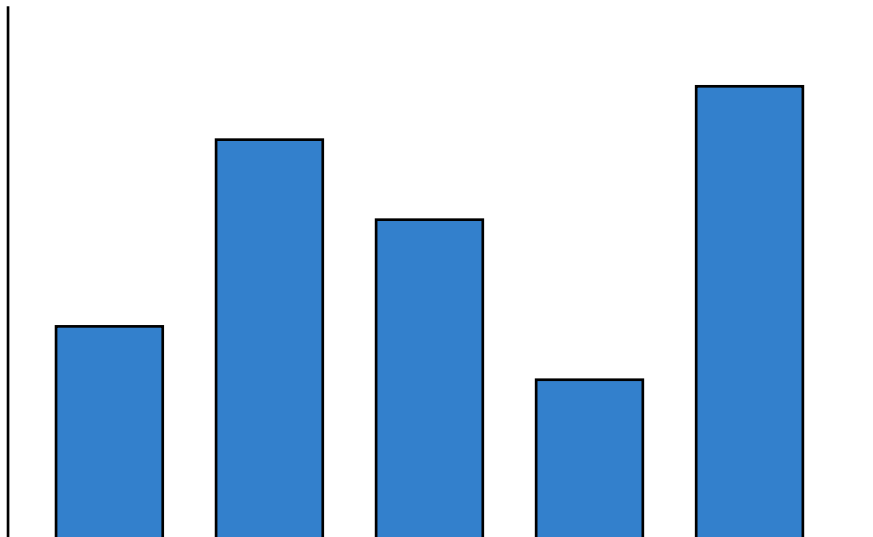

Left column starts here and keeps going for a few lines until it reaches the end.

A second left paragraph follows after a gap.

Right column text begins only after the left one is finished being read.

Right side second para closes the page.

3. Figures

The chart above shows growth.
